

The University of Minnesota Master Gardener Program trains volunteers to work educating people in their communities about horticulture. More information about the program is available at [the Master Gardener website.](#)

The Master Gardener Program in St. Louis County is open to all adult St. Louis County residents. Positions in the program are available on a limited basis. We maintain a list of residents that are interested in becoming a Master Gardener. When we open up the application process we will notify all those on the list. If you are interested in becoming a Master Gardener, please contact the Extension office at 218-733-2870. We will add your contact information to our list. Upon acceptance into the program, you must then take the HORT 1003 Master Gardener Core Course/Horticulture for the Home Garden course through the University of Minnesota. The course is available online and it is periodically offered as a classroom course in counties throughout Minnesota.
