**Skill Sheet**

**O-102, Given General Purpose Vehicle, Locate and Identify Equipment**

During a walkaround checkout of a general purpose suburban, locate the trauma kit, oxygen bag with suction kit, cervical collars, traction splint bag, KED board, Mustang suit, any water rescue throw bags or "Frisbees," body bags, and equipment for setting up an aircraft landing zone (ALZ). Are there any questions?

**NOTES TO EVALUATOR:**

Accompany the candidate on a walk-through of a general purpose suburban. A Thursday night meeting is a great opportunity for this, since most remote trucks are present. The candidate should be able to touch or grasp each colored bag and tell you what's inside, like the KED (green bag), C-collars (blue bag), V-Vac suction unit (yellow bag attached to the Oxygen Kit), Mustang Suit (big yellow bag), etc. Score them a No-Go if they get any wrong. Be a little more lenient with items such as body bags and ALZ lights. These are often packaged differently and bang around the back of the truck, so they may take some rooting around a bit to pinpoint.
