**Skill Sheet**

**V-102, Locate, Identify and Describe 6x6 ATV Controls & Functions**

During an equipment checkout with an evaluator, locate, identify, and describe the controls and functions of all makes of 6x6 All-Terrain Vehicle (ATV) in your local office. Do you have any questions?

**NOTES TO EVALUATOR:**

While all criteria are on-the-spot correctable by themselves, the candidate should complete the checkout with no more than one mistake. Score the candidate a No-Go if he or she misses more than one item.

Task	Go	No-Go
Identifies fuel shut-off, demonstrates both on and off positions		
Identifies ignition key, describes key positions; locates kill switch and demonstrates positions; states to never store vehicle with kill switch engaged.		
Locates choke; states and demonstrates positions		
Identifies throttle and brake		
Identifies gear selector, describes all ranges and reverse; states never to change settings while engine is revved higher than idle		
Identifies connector for trickle charger/battery maintainer (if equipped); describes disconnecting before moving machine or trailer		
Identifies winch assembly and controls (if equipped)		
Identifies all illumination/navigation/instrument lights		
Identifies/describes all 4WD controls and overrides.		
Identifies fuel cap; states correct grade of fuel and storage location		
Identifies pull-start cord		

There are no critical criteria with this checkout. All criteria are on-the-spot correctable.
