Skill Sheet

W-109, Locate, Identify and Describe Zodiac ("Red-Z") Controls & Functions

During an equipment checkout with an evaluator, locate, identify, and describe the components, controls, and functions of the Red Zodiac. Do you have any questions?

NOTES TO EVALUATOR:

While all criteria are on-the-spot correctable by themselves, the candidate should complete the checkout with no more than two mistakes. Score the candidate a No-Go if he or she misses more than two items.

Task	Go	No-Go
Locates master power switch		
Identifies ignition key, describes key positions; describes throttle and choke positions for cold and warm starting		
Locates and describes controls for radio; demonstrates adjusting volume and frequency		
Locates and describes controls for depth sounder; demonstrates changing zoom		
Demonstrates controls for GPS (if equipped)		
Locates and demonstrates navigational and emergency lights		
Describes placement of fenders and mooring lines		
Describes and demonstrates (simulation okay) connecting fuel lines; demonstrates (simulation okay) priming for initial start following refueling		
Locates bilge plugs; states ensuring plugs is secured before launching		
Locates accessory equipment, including PFD's, hand lanterns, line, etc.		
Identifies/locates/describes use of power tilt or trim		
Describes/demonstrates positioning of motor for launch/trailing		

There are no critical criteria with this checkout. All criteria are on-the-spot correctable.
