FYI and for the file.

Mark-I already responded to the two questions below.

Thanks much,
Jenny

Ms.Bourbonais,

We are writing in regards to the letter we received on September 22, 2020 regarding the notice of a Commercial Communication Tower as a Utility Facilities - Class II that will be placed at less than the tower height from a public right-of-way. My husband and I have many concerns about this tower going up next our land. We bought our land as a means of retirement to get away from the hustle and bustle of the city noises and lights. If this goes up we will see the lights flashing on and off all night. Instead of seeing the stars we will see AT&T flashing lights. We believe this tower going up will decrease the value of our land because no one wants to have land right next to a tower.

A question of concern is whether that land is zoned Commercial and would in turn then increase our property taxes? Will this affect the float planes that fly over with it being so tall?

In closing we are against something like this going up so close to our land. If you have any questions or concerns, please feel free to call us at 507-724-3636.

Thank you we appreciate your attention to this matter.

Shelley and Bruce Meyer
