

# **2008 Progress Report Forms For Public Agency, Conservation Group, and Other Non-Industrial Forest Landowners**

**Please complete and return by March 31, 2009 to:**

**Rachel Dierolf  
1600 Wilson Boulevard; Suite 810, Arlington, VA 22209  
Phone: 613/325-2330 Fax: 613/792-1470 Email : [rachel.dierolf @sfiprogram.org](mailto:rachel.dierolf@sfiprogram.org)  
E-mail submissions are encouraged**

**2008 Progress Report for Public Agency, Conservation Group, and Other Non-Industrial Forest Landowners****Program Participant:** St. Louis County Land Department**Certification Body (if 3<sup>d</sup> party certified):** QMI-SAI Global**I. General Information**A. Forestland<sup>i</sup> Information for Program Participant (list in acres only; to convert from hectares to acres, multiply number of hectares by 2.471)

State or Province (for multiple locations add rows)	Total Acres Managed	Acres Certified to the SFI Standard <sup>1</sup>
List State/Province <u>Minnesota</u>	895,193	895,193

<sup>1</sup>Include only forest management certifications on the acres managed.

C. Recreation (list in acres only; to convert from hectares to acres, multiply number of hectares by 2.471)

1. For lands owned or controlled by your organization, how many acres are open to the public for recreation (this includes private leases and public permits)? 895,193 (U.S. acres) \_\_\_\_\_ (Canadian acres)

**II. Harvesting and Reforestation—Participant Land** (list in acres only; to convert from hectares, to acres, multiply number of hectares by 2.471)A. How many acres of harvest units<sup>ii</sup> were completed in 2008<sup>iii</sup> by?

Harvest Method	U.S. Acres	Canadian Acres
1. Clearcutting <sup>iv</sup>	6,480	
1a. Average size of clearcut harvest areas	23.96	
2. Seed Tree and Shelterwood	0	
3. Selection Methods	168	
4. Thinning or Sanitation Salvage	277	

Note: SFI 2005-2009 Performance Measure 5.2 states: *Program Participants shall manage the size, shape, and placement of clearcut harvests. Indicators: 1. Average size of clearcut harvest areas does not exceed 120 acres, except when necessary to respond to forest health emergencies or other natural catastrophes. 2. Documentation through internal records of clearcut size and the process for calculating average size*

Please provide explanation if the average size of your clearcut harvest areas exceeds 120 acres

Disease or insect outbreak? \_\_\_\_\_  
 Fire salvage? \_\_\_\_\_  
 Windthrow? \_\_\_\_\_  
 Hurricane? \_\_\_\_\_  
 Government regulations requiring larger harvest areas? \_\_\_\_\_  
 Other, please explain: \_\_\_\_\_

B. 2008 Reforestation<sup>v</sup> Activities and 5-Year Assessment<sup>vi</sup> (Section 1 is for US, Section 2 is for Canada)

## 1. Reforestation Data for the United States

Regeneration Type	Within 1 year of Final Harvest (acres)	Within 2 years of Final Harvest (acres)	More than 2 years after Final Harvest (acres)	Total for 2008 (sum of all three-acres)	Percent of Harvest Units Regenerated After 5 Growing Seasons
<b>1. Artificial</b>					
<b>a. Planting</b>	327	+ 399	+ 265	= 991	
<b>b. Direct Seeding</b>	247	+ 0	+ 0	= 247	
<b>2. Natural</b>	<b>Acres In 2008</b>				
<b>a. All types</b>	8,392				
<b>3. Artificial and Natural</b>					
<b>a. All types</b>					<b>100 %</b>

## 2. Reforestation Data for Canada (list in acres only; to convert from hectares to acres, multiply number of hectares by 2.471)

Regeneration Type	Within 1 year of Final Harvest (acres)	Within 2 years of Final Harvest (acres)	More than 2 years after Final Harvest (acres)	Total for 2008 (sum of all three-acres)	Percent of Harvest Units Regenerated After 5 Growing Seasons
<b>1. Artificial</b>					
<b>a. Planting</b>		+	+	=	
<b>b. Direct Seeding</b>		+	+	=	
<b>2. Natural</b>	<b>Acres In 2008</b>				
<b>a. All types</b>					
<b>3. Artificial and Natural</b>					
<b>a. All types</b>					<b>%</b>

**III. Research Funding – Internal & External<sup>vii</sup>—(\$US and \$Canadian)**

Category	Funding—United States		Funding—Canada	
	Internal (\$US)	External (\$US)	Internal (\$Canadian)	External (\$Canadian)
A. Forest Health & Productivity	\$ 25,000			
B. Water Quality	\$ 5,000			
C. Wildlife and Fish	\$ 5,000			
D. Landscape/Ecosystem Management and Biodiversity	\$ 5,000			
E. All Other	\$14,000			

**IV. SFI Implementation Committee Support<sup>viii</sup>**

- A. Funding provided in 2008 for SFI program implementation activities at the state or provincial level:  
Support for US SICs (\$US) \_\_\$ 1,000\_\_ Support for Canadian SICs (\$Canadian) \_\_\_\_\_.

**St, Louis County Land Department**

Program Participant	Affirmed by (Signature) (optional if submitted via e-mail)	
Mark Reed	Mark Reed, Deputy Land Commissioner	
Contact (for more information)	(Please print name and title for affirmed by)

## ENDNOTES

---

<sup>i</sup> **A forested area** is classified as “forestland” if it is at least one acre in size and contains ten percent tree cover.

<sup>ii</sup> **Completed harvest units:** these questions are directed solely at harvest and regeneration activities on participant-owned lands, or lands under long-term lease to the participant, or lands for which the participant has forest management responsibilities. (A long-term lease is one that extends beyond a single rotation. If the number of years specified in or remaining on a lease is less than one rotation, the lands covered by such a lease would be considered “non-industrial” lands for SFI program compliance and reporting requirements).

<sup>iii</sup> **Completed in 2008:** refers to units where harvesting was completed in 2008. For example, harvesting activities might have begun in a unit in 2007, but were not finished until 2007; in this case, harvested acres would be reported as “completed in 2008.”

<sup>iv</sup> **Definition of “clearcut:”** a variety of definitions exist for the term “clearcut.” In order of preference, the following definitions should be used:

- First, use the legal definition within the state or province in which harvesting activities took place;
- Second, if no legal definition exists within the state or province, use the Society of American Foresters (SAF 1998) definition: Clearcutting is a regeneration or harvest method that removes essentially all trees in a stand;
- Third, if the SAF definition is deemed to be inappropriate for your operations, use a company-specific definition that is consistent with the spirit and intent of the SFI, but please provide SFI with the definition used.

<sup>v</sup> **Replanting and Direct Seeding Timing.** The replanting “clock” starts after the entire unit is harvested or the sale has been completed (see guidance under completed harvest units above). Do not include areas that were replanted due to poor seedling survival. “Failed plantation” data are ultimately captured in the five year regeneration success question.

<sup>vi</sup> **Five Year Reforestation Success.** This question is designed to provide information on regeneration successes across all regeneration categories: planting, seeding & natural regeneration. As an example, for the time frame ending 12-31-08, list the percentage of harvest units that have adequate regeneration after five complete growing seasons post-harvest.

<sup>vii</sup> **Internal and External Research Funding.** List the amount of funding in \$US your organization provided this year for forest-related research within your organization (internal) and outside your organization (external) through grants, in-kind assistance, cooperatives, etc. Internal research funding includes salaries for forest-related research staff. While it is difficult in many instances to identify to which category research funding should be allocated, use your best judgment as to the primary intent of the given research project. If you find it impossible to allocate funding to the categories listed, list the total funding you provided in the “other” category and note as such.

<sup>viii</sup> **SFI Implementation Committee Support.** Include all funding your organization provided in 2008 to SFI Implementation Committees and others for logger training and education and all other SFI program implementation activities at the state or provincial level.
