

# GOOGLE EARTH - EXPLORER

## St. Louis County, Minnesota

### Query and Map County Land Record Data using Google Earth

**About:** St Louis County publishes county land records data as KMZ files. These KMZ files are then viewable in Google Earth.

Google Earth is a 3rd party application developed by Google, Inc. and installed on a client computer. This application is not controlled by St. Louis County. The county only controls the data files which are viewable in Google Earth. This map application is similar to the County Land Explorer but has 3D and other capabilities.

**Audience:** The application is intended for a variety of users such as: general public, realtors, appraisers, surveyors, engineers, insurance adjusters, title companies, developers, non-profits, universities, and our government partners who need land record data to conduct business.
